Magit Reference Card

Getting help in Emacs

C-h k ⟨**key**⟩	describe function bound to ⟨key⟩
C-h b	list the current key-bindings for the focus buffer
C-h m	describe mode
C-h l	show the keys you have pressed
⟨**prefix**⟩ **C-h**	show all key-bindings beginning with ⟨prefix⟩

Section Movement

p	previous section
n	next section
P	previous sibling section
N	next sibling section
ˆ	parent section

Staging

s	stage change at point
u	unstage change at point
S	stage all changes in worktree
U	reset index to some commit
M-x magit-unstage-all	remove all changes
M-x magit-stage-file	stage current file
M-x magit-unstage-file	unstage current file

View Git Output

$	display process buffer for current repository
k	kill process represented by section at point

Section Visibility

TAB	toggle visibility of current section
C-TAB	cycle visibility of section and children
M-TAB	cycle visibility of diff-related sections
S-TAB	cycle visibility of all sections in buffer

Status/Diff/Log Buffer

SPC	update commit/diff buffer or scroll up
DEL	update commit/diff buffer or scroll down
h	show dispatch popup
g	refresh
G	refresh all
q	bury current buffer
L	toggle margin
x	soft reset (hard when argument is given)
y	show references (tags and branches)
Y	cherry
C-c C-b	move backward in buffer's history
C-c C-f	move forward in buffer's history

Popups

!	running git	**f**	fetching	**o**	submoduling
b	branching	**F**	pulling	**r**	rebasing
B	bisecting	**l**	logging	**w**	apply patches
c	committing	**m**	merging	**W**	format patches
d	diffing	**M**	remoting	**t**	tagging
E	ediff	**P**	pushing	**z**	stashing

Status/Diff/Log Buffer

e	ediff DWIM
i	gitignore
I	gitignore locally

Diff Buffer

RET	visit file (or blob) at appropriate position
C-RET	visit file at appropriate position
−	decrease context of diff hunks
+	increase context of diff hunks
0	reset context of diff hunks to default height
j	jump to diff stat ↔ diff section

Log Buffer

+	show more history
C-c C-c	select commit at point and act on it
C-c C-k	abort selecting commit

References Buffer

y	compare references with HEAD
c	compare references with current branch
o	compare references with other branch

Blaming

M-x magit-blame	display edit history of file
RET	show the commit at point
SPC	update commit/diff buffer or scroll up
DEL	update commit/diff buffer or scroll down
n	move to the next chunk
N	move to the next chunk (same commit)
p	move to the previous chunk
P	move to the previous chunk (same commit)
q	turn off magit blame mode
t	show or hide blame chunk headings

Repository Setup

M-x magit-init	initialize a Git repository
M-x magit-clone	clone a repository
